A Closer Look at Records - Livestock Project Insert

A Closer Look at Alaska 4-H - Livestock Project Insert is a guide to assist 4-H members in completing the *Alaska State 4-H Livestock Project Insert*.

Recordkeeping is a skill necessary throughout life. Good recordkeeping practices can save a person time, money and even stress.

Begin with the *Livestock Project Insert* at the time you start your project work. It's important to write your goals before you commence — what you want to learn, or do in your project. These goals will give you and your 4-H leader an idea of where to start. You should have a *Livestock Project Insert* for each 4-H project completed.

The key to success in recordkeeping is to write down the information in the *Livestock Project Journal* as you go along. Making an entry in your journal may not seem important at the time, but later on it will help you write your 4-H story, will help you count up how much time you spent on a project, and may just help you remember a special time with your livestock project or with your club. Think of your *Livestock Project Journal* as a diary. Diaries are informative and often entertaining to look back at!

Good luck with your 4-H recordkeeping! Remember, if you have questions, you can ask for help from an experienced 4-H'er, a 4-H leader or Cooperative Extension Service 4-H staff.

Marla Lowder
4-H/Youth Development Extension Agent

Use the *Livestock Project Insert* for livestock related projects. Complete page 1 at the beginning of the project.

For each project you are enrolled in, you will need a separate *Livestock Project Insert*. At the top of each one, write the name of project that insert is for. An example would be: “Finished Beef.” If you have another project, an example on a separate insert would be: “Market Turkey.”

Write your name.

How many years have you taken this particular project? If it is your first year, put one; second year, two; and so on.

How many years have you been enrolled in 4-H?
How many years have you accumulated as a 4-H
member? If you took a year or two off, that's OK.
Write the number of years accumulated. (This num-

In this section your parent(s)/guardian will write what they will do to help you achieve your goals for the project. This could include driving you to

For some of you, your project leader may be your parent(s)/guardian, so this section and the next may be the same. The leader needs to write what he/she is willing to help you do. For example, “I will hold project meetings to teach about raising and showing swine.” The leader needs to sign and date it.

The “Supplies Record” is where you will write a description of non-feed supplies purchased. The “Feed Purchase Record” is where you will write a description of feed types and amounts purchased, including mineral supplements. An example would be: the date of purchase, the brand/manufacture’s name with

WEIGHT

DATE

Write down the month, day and year of when you weigh your project animal(s).

Method Used: Weight Tape, Scale Type, Other

Describe the method used to weigh your project animal(s).

Weight Description: Birth, Purchase/Start, Official Fair. End of Project, Other

Write a description to explain why you weighed your project animal. Examples could be: “Project Weight at possession,” “Project Weight Check,” or “Official 4-H Market Weigh In.”

Weight

Record the weight and label the unit. Example would be: 35 lbs. or 273 pounds.

PROJECT ANIMAL VETERINARY RECORD AND PROOF OF VACCINATION: Page 6

Include a copy of this form for each animal. The purpose of the “Project Animal Veterinary Record” is to help you keep track of any injuries, illnesses,

vaccinations, parasite control, vitamins/minerals, castration, dehorning, medication in feed, etc.

If you did not have anything to record on this form write “not applicable” or “none given” to help explain the blank form.

NOTE: If raising a market animal(s), be sure you do not use any drugs or medications that are not cleared for use in meat animal(s) and follow drug withdrawal periods prior to livestock market auctions or slaughter.

ACTIVITY JOURNAL: Page 7 and 8

The purpose of the “Activity Journal” is to help you keep track of time spent with your animal; changes in feeding, exercise and training routines; work on animal pens, and other activities related to your animal project. When you complete the project, there will be a record of what you have done. **The key to success in this section is to complete it as you go along.** Additional “Activity Journal” pages may be added if needed.

Date

Write down the month, day and year of the activity. It is best to do this at regular intervals, such as once a week or at the end of a project meeting.

Activity Journal Description

Write a description of what you did that is related to your livestock project. An example would be: "I tagged my steers, gave vaccinations, took photographs, and weighed my steers using the Heart Girth X Heart Girth X Body Length /300 =Pounds measurement method."

Time

Record the amount of time you spent on your activity. Examples could be: "I spent 15 minutes feeding and watering my steer," "The project meeting to learn about shearing sheep was 60 minutes," or I worked on my poultry showmanship presentation for 30 minutes." Add the total time at the bottom of the page.

PROJECT FINANCIAL SUMMARY: Page 9

The "Project Financial Summary" fits most projects. There will be some projects in which you enroll that may not involve materials, expenses, or income. If you believe this to be the case, write at the top of the page, "Does not apply to this project."

Beginning Value

The lines at the top of the page are provided for you to list any materials, animals, and equipment that you had at the start of your project year or carried over from previous years. To complete this section, write the **date** you are making the entries. List and describe things you already have that you use for the project. Indicate with a number **how much/how many**. Next list the **monetary value** of the item(s) in dollars and/ or cents.

Income/Value

If you sell any equipment or project items during the course of the time you are involved in the project, record it on the appropriate line. Also include 4-H exhibition show premiums, fair premiums, and other project related earnings.

NOTE: Income that is specific to 4-H District events may be listed in the "Other" line.

Total Income from Project

Add up all the above lines in the "Income/Value" section and write the amount.

Costs

(Use Livestock Project Insert Records to Help Complete the Costs)

If you purchase any supplies, equipment or have other expenses related to your project, record them on this line. You may also note this in your "Activity Journal." Examples would be describing time spent to purchase animals or feed.

Total Cost of Project:

Add up all the lines in the "Costs" section and write the amount.

Profit (Subtract Costs from Income)

The next step is to subtract the costs from the income if the income is greater than the costs.

In this case you will show a profit. Write this amount on the profit line.

Total Time Spent on Project (Use Livestock Project Insert Activity Journal Time Records to Help Complete the Total Time Spent on the Project)

The last piece of information requested on the “Project Financial Summary” is “Total Time Spent on Project (from “Activity Journal”). This information will be come from the “Activity Journal.” The “Project Financial Summary” is dependent on what is recorded in the “Activity Journal,” making both of these important parts of the 4-H Livestock Project Insert.

RATE OF GAIN WORKSHEETS: Pages 10 and 11

Successful Market Livestock Projects include enough information about how much weight is gained, how much feed is consumed, how efficiently feed is used and how much money is spent and earned for you to

judge the success of your project this year and plan improvements for future projects. Use information from your “4-H Livestock Project Insert” to complete your Rate of Gain pages.

NOTE: The “Rate of Gain Worksheets” fit most projects. There will be some projects in which you enroll that may not be applicable. If you believe this to be the case, write at the top of the page, “Does not apply to this project.”

Rate of Gain Worksheets

Successful Market Livestock Projects include enough information about how much weight is gained, how much feed is consumed, how efficiently feed is used and how much money is spent and earned for you to judge the success of your project this year and plan improvements for future projects.

A. The rate at which an animal gains weight can be calculated from your weight records.

AVERAGE DAILY GAIN (ADG) = Weight gained(lbs) divided by # of days fed = Pounds gained per day(lbs/day)

Example: A calf weighed 90 lbs when purchased and it weighed 290 lbs after feeding it for 100 days.

Weight gained = 290 lbs - 90 lbs = 200 lbs

ADG = 200 lbs divided by 100 days = 2 lbs/day

Question: Is ADG in May the same as ADG in July? ____ Can you change your ADG? ____

Boxes 1 & 2 are for large livestock. Box 3 is for small livestock (poultry, rabbits, caviies)

(1) Calculate your animal's ADG from possession ____ (date) until weigh-in: ____ (date)

____ lbs gained divided by ____ days = ____ lbs/day

(2) Calculate your animal's ADG from weigh-in ____ (date) until fair weigh-in: ____ (date)

____ lbs gained divided by ____ days = ____ lbs/day

(3) Small stock only — Calculate your animal's ADG:

____ weight at fair divided by ____ days of age = ____ lbs/day

B. The amount of feed an animal eats per day can be calculated from your feed records.

AVERAGE DAILY FEED INTAKE (ADFI) = Total feed (lbs) divided by # of days fed = pounds consumed per day (lbs/day)

Example: A pig ate 550 lbs of feed (including pig chow, grain, concentrates, milk solids, etc.) in a period of 100 days.

ADFI = 550 lbs divided by 100 days = 5.5 lbs of feed consumed per day

Question: Why is ADFI different from ADG?

Calculate your animal's ADFI:

____ lbs total feed divided by ____ days fed = ____ lbs/day

Rate of Gain Worksheets

C. The amount of feed required for each pound an animal gains can be calculated from weight and feed records.

FEED CONVERSION (FC) = Total feed (lbs) divided by weight gained (lbs) = Pounds eaten per pound gained (lbs/lb)

Example: A goat ate 150 lbs of feed (hay, grain, goat chow, concentrates, milk solids, etc.) during a period of 100 days. It weighed 30 lbs when purchased and it weighed 80 lbs after 100 days.

Weight gained = 80 lbs - 30 lbs = 50 lbs

FC = 150 lbs total feed divided by 50 lbs weight gained = 3 lbs of feed consumed per lb gained

Question: Do you want your FC to be a big number or a little number? ____

Calculate your FC:

____ lbs total feed consumed divided by ____ lbs weight gained = ____ lbs fed/ lb gained

D. The amount it costs for each pound gained by an animal can also be calculated from feed and weight records.

FEED COST PER POUND OF GAIN= Cost of feed divided by weight gained (lbs) = \$/lb

Example: A turkey ate two bags of turkey feed, which cost \$25 (\$12.20 per bag). It weighed ¼ lb when obtained and it weighed 25 and ¼ lb at the end of the project.

Weight gained was 25 lbs.

Feed Cost= \$25 (total feed cost) divided by 25 lbs (weight gained) = \$1 cost per pound

Question: Can you change your feed cost per pound of gain? ____

How?

Calculate your feed cost per pound of gain:

\$ ____ feed cost divided by ____ lbs weight gained = \$ ____/lb

PROJECT HIGHLIGHTS: Page 12

“Project Highlights “are to be written when your project is completed. The purpose of the “Project Highlights” is to help you evaluate your growth in the project.

What Was Learned

The first section tells you to write about what was learned. The instructions direct you to include “at least SIX NEW things learned this year” in your project. What was learned could be knowledge (“I learned how to flip a rabbit on its back for showmanship”). What was learned could also be a skill (“I
